scikit-optimize

Sequential model-based optimization in Python

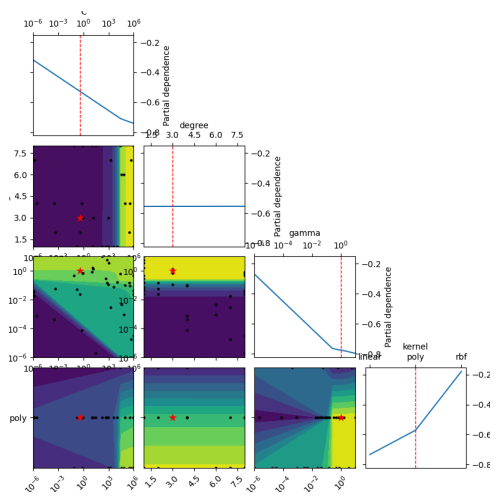

Getting Started What's New in 0.8.1 GitHub

- Sequential model-based optimization
- Built on NumPy, SciPy, and Scikit-Learn
- Open source, commercially usable - BSD license

BayesSearchCV

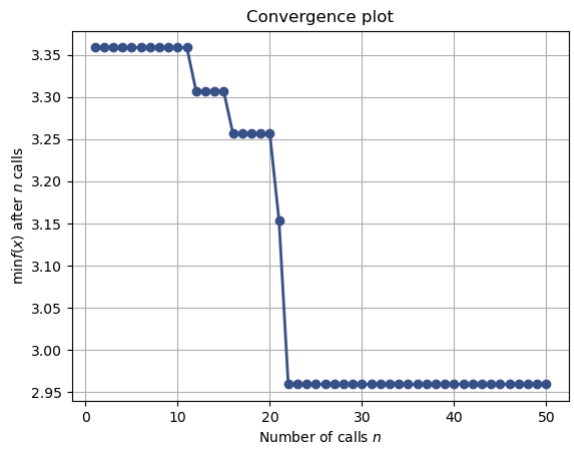

Scikit-learn hyperparameter search wrapper.

Search for parameters of machine learning models that result in best cross-validation performance
Algorithms: BayesSearchCV

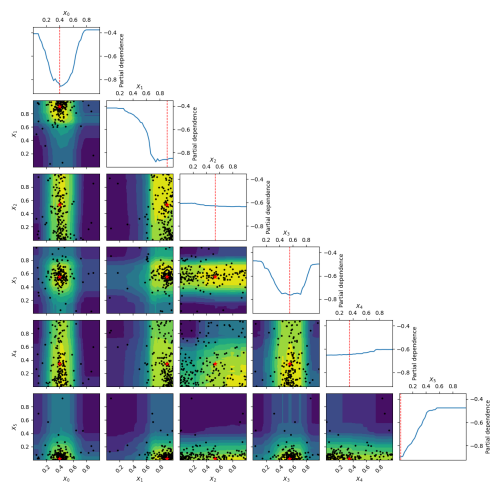

Tuning

Tuning a scikit-learn estimator with skopt

Visualizing

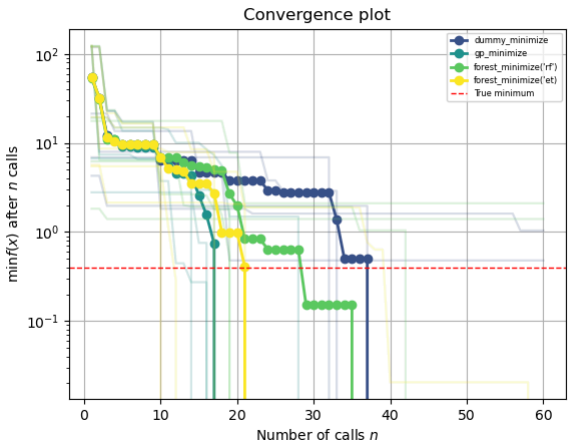

Visualizing optimization results

Comparing surrogate models

Comparing surrogate models

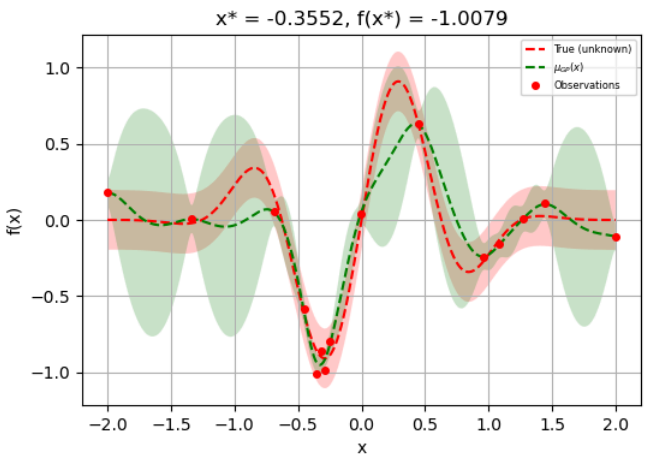

Algorithms: dummy_minimize, gp_minimize, forest_minimize

Bayesian optimization

Bayesian optimization with skopt

Algorithms: gp_minimize
